

## Aim: Simple applications using JSP and AJAX

- Built an Ajax program to read content from a text file and display it on the browser.

### Code:

```
<!DOCTYPE html>
<html>
<body>

<div id="demo">
<h1>The XMLHttpRequest Object</h1>
<button type="button" onclick="loadDoc()">Change Content</button>
</div>

<script>
function loadDoc() {
    var xhttp = new XMLHttpRequest();
    xhttp.onreadystatechange = function() {
        if (this.readyState == 4 && this.status == 200) {
            document.getElementById("demo").innerHTML =
                this.responseText;
        }
    };
    xhttp.open("GET", "ajax_info.txt", true);
    xhttp.send();
}
</script>

</body>
</html>
```
